

## Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

MEDICAL EDUCATION IN THE UNITED STATES<sup>1</sup>

## CONTENTS

<i>Medical Education in the United States:</i> DR. GRAHAM LUSK .....	491
<i>The Botanical Exploration of Amboina by the Bureau of Science, Manila:</i> DR. ELMER D. MERRILL .....	499
<i>Marine Biological Laboratory Investigators, 1913</i> .....	502
<i>The Microorganism causing Epidemic Polio-myelitis</i> .....	504
<i>Scientific Notes and News</i> .....	506
<i>University and Educational News</i> .....	510
<i>Discussion and Correspondence:—</i>	
<i>The Pelycosaurian Mandible:</i> PROFESSOR S. W. WILLISTON. <i>The Distance House Flies, Blue Bottle and Stable Flies may travel Over Water:</i> PROFESSOR C. F. HODGE. <i>The Word "Fungus":</i> PROFESSOR J. C. ARTHUR.	512
<i>Quotations:—</i>	
<i>The American University from Two Points of View</i> .....	514
<i>Scientific Books:—</i>	
<i>Determination of Time, Longitude, Latitude and Azimuth:</i> DAVID RINES. <i>Carpenter on the Climate and Weather of San Diego, California:</i> WILLIAM G. REED .....	514
<i>Notes on Meteorology and Climatology:—</i>	
<i>International Meteorology; Evaporation from Lake Surfaces; Volcanoes and Climate:</i> CHARLES F. BROOKS .....	519
<i>Degrees conferred by the University of Birmingham</i> .....	521
<i>The New International Diamond Carat of 200 Milligrams:</i> DR. GEORGE F. KUNZ .....	523
<i>Special Articles:—</i>	
<i>The Mechanism of Fertilization:</i> PROFESSOR FRANK R. LILLIE .....	524

## HISTORICAL

THE first medical school in the United States was organized in 1765 in connection with the University of Pennsylvania by Dr. W. Shippen, the anatomist, and Dr. John Morgan, both of whom had been favorite pupils of the Hunters in London and were graduates of Edinburgh. The Harvard Medical School was founded in 1783 by Dr. John Warren, who had been a military surgeon in the army from the battle of Bunker Hill until ill health forced his retirement. Anatomy was taught by demonstrations, but in 1809 a room was opened which offered to students opportunities for dissection similar to those given by the Hunters in London. It is stated that these facilities were superior to those obtainable on the continent of Europe.

As time went on there was a great increase in the number of medical schools; the older schools either dropped their university affiliation or this became nominal. The "proprietary school" arose, in which a few practising physicians came together for the purpose of giving lecture courses and clinics to medical students during a period of five months each year. The students listened to the same courses during two successive terms and, after passing an examination, received the degree of M.D. eighteen months subsequent to the beginning of their medical studies. Attempts to raise the standard of medical education were always accompanied by a loss of fees,

<sup>1</sup> A report prepared for the International Conference on Post-graduate Medical Education held at the time of the Seventeenth International Medical Congress, London, 1913.
